

SHRAOSHI BASAK

Frontend Developer | Cyber Security Intern

basakshraoshi.8674@gmail.com | +91 9163560254 | Uttarpada, WB, India

[GitHub](#) | [LinkedIn](#) | [portfolio](#)

Summary:

Cybersecurity undergraduate with a strong interest in web development and information security, supported by hands-on experience in building practical frontend and security-focused projects. Committed to continuously expanding technical knowledge, solving real-world challenges, and adapting to emerging technologies. Seeking an internship or entry-level opportunity to contribute to a collaborative team, gain industry experience, and grow as a cybersecurity professional.

Technical Skills:

Languages: C, Python, JavaScript

Web Technologies: HTML5, CSS3, JavaScript

Tools: Git, VS Code

Database: SQL

Languages:

Bengali(Native), English(Proficient), Hindi(Advanced)

Education:

Guru Nanak Institute of Technology (GNIT)	Kolkata, India	August 2024 - August 2028
Under MAKAUT, B.Sc. in Cyber Security (Ongoing)		
Uttarpada Girls' High School (UGHS), Higher Secondary - WBCHSE	Kolkata, India	
Percentage: 89%		
Uttarpada Children's Own Home (UCOH), Secondary - WBBSE	Kolkata, India	
Percentage: 77%		

Projects:

Portfolio	HTML, CSS, JAVASCRIPT
Developed a responsive personal portfolio website to represent my cybersecurity journey, technical skills, and hands-on projects. Built an interactive frontend with a clean UI, optimized navigation, theme customization, and structured project showcase. The portfolio serves as a professional digital identity highlighting my programming knowledge, security-focused projects, and continuous learning in the field of cybersecurity.	
Password Strength Analyzer	HTML, CSS, JAVASCRIPT
Developed a web-based password strength analysis tool that evaluates password security based on multiple parameters such as length, character complexity, and the presence of uppercase letters, lowercase letters, numbers, and special characters. Implemented real-time strength checking with user-friendly feedback to help users create stronger and more secure passwords. The project demonstrates practical application of frontend development and cybersecurity awareness concepts.	

Experience:

Smart India Hackathon (SIH) 2025 (Participant)
Participated in Smart India Hackathon as a team member. Contributed to the project "[AI-Driven Quality Check & Blockchain Traceability for Herbs](#)," focused on improving quality inspection and supply chain traceability using Artificial Intelligence and Blockchain.

Certifications:

- Solutions Architecture Job Simulation - [AWS](#)
- GenAI Job Simulation - [BCG](#)
- Cybersecurity Analyst Job Simulation - [TATA](#)
- A Systematic Review of Blockchain-Based Security Architectures for Trusted Cloud Data Sharing: Threat Models and Open Challenges - [Journal of Techniques - Sciences - Methods](#)

Publications:

- A Systematic Review of Blockchain-Based Security Architectures for Trusted Cloud Data Sharing: Threat Models and Open Challenges - Full paper: <https://tsmjournals.com/volume-10-issue-4-2026/>
- Offline-First TinyML-Federated Learning Framework for Privacy-Preserving and Energy-Efficient Smart Healthcare Systems - Full book chapter: <https://zenodo.org/records/20664766>
- Preparing an IEEE research paper on "EPQ-SDT: An Edge-Assisted Post-Quantum Secure Data Transmission Framework for IoT-Cloud Systems"
